KOEDIA offers an innovative ready-to-go package solution both in production and distribution. Designed to streamline processes, our solution turns what was an old fashioned method into a profitable and easy-scalable activity. The system is composed of stand-alone blocks to give you exactly what you need.

On one hand, more than 150 dynamic connectivities help to avoid complex data loading and hence, considerably reduce the TTP (time to produce). On the other hand, packages are available on a brand-new website based on the best B2C practices commonly used in package distribution.

**THINGS TO REMEMBER...**

- Use the technology in stand-alone or combine it with our merchant partners
- Our capacity to build a customized system
- Get access dynamically and in real-time to your suppliers stocks and prices
- Get the best time-to-market solution
